

OUR NEW WELLNESS INNOVATION

SWAY

THE NEW PENDULUM LOUNGER
FOR YOUR HOME.

THE NEW PENDULUM LOUNGER FOR YOUR HOME.

THE FIRST LOUNGER USING MOTION TO HELP YOU UNWIND

Now there is a simple way for you to generate energy while you are sleeping: With power napping. Simply close your eyes and SWAY – the new lounge from KLAFS – will sway you into a rejuvenating power nap with its gentle pendulum motion. Within seconds your body will be overcome by a blissful sensation that will not only allow you to forget the routine of everyday life but you will be oblivious to the motion of the lounge. Instead, the pendulum frequency sees to it that body and mind comes to rest. Even if you do not go into a deep sleep during this time, all it takes is 15 to 20 minutes to wake up fully relaxed once again. Consequently not only are your concentration and performance enhanced, but you are able to get on with your day with greater zest. Irrespective of the time of day!

A safety concept that has inspired the German Association for Technical Inspection, TÜV: Not only is the appearance of the aluminium coloured edge-protection strip particularly upscale, but it also ensures safety thanks to the Safety Stop.

Findings by the Fraunhofer IAO confirm that you relax quicker with the sophisticated motion technology of SWAY than with conventional rest.

Contemporary and timeless at the same time, the upscale design of SWAY will enhance any ambiance. The high quality craftsmanship of the lounge is inviting and can aesthetically be suitably placed in any sauna or relaxation area or even can be used as a guest bed. Technology and adjustable feet disappear below the lounge so that they are not visible, which not only visually provides the appearance of the floating object; psychologically the sway sensation provides the user with the unique 'floating' experience. A practical added benefit: The height adjustable feet ensure that it stands secure on any floor surface.

For visual compatibility you can choose the colour of the cover to coincide with your personal taste and furnishings. The soft textile leather feels good to the touch, is extremely durable and is easy to clean and maintain. First-rate workmanship and the high quality that is synonymous with KLAFS will guarantee that with SWAY you will be able to achieve wellness for more than just 15 minutes, but for many years to come.

Sand Beige Sagarik Gold Chocolate

White Fango Black

Our selection of available colours in textile leather – our specialised consultants will gladly advise you on other materials.

Top quality workmanship in minute detail: Upholstery covers made from textile leather with classical leather grain and ornamental stitching in contrasting colour make SWAY a highly exclusive piece of furniture.
